Summary

Frontend Engineer with 5+ years of experience building **UI/UX-focused, scalable web applications** using **React, TypeScript, and modern frontend architecture**. Strong expertise in **design systems, UI/UX workflows, and responsive design**, with hands-on experience translating **user flows and wireframes into high-quality interfaces**. Proven ability to lead **UI/UX decisions**, collaborate with designers using **Figma**, and deliver performant, accessible, and testable applications from **discovery to delivery**.

Core Skills

Frontend & UI Development: React, TypeScript, JavaScript (ES6+), Angular, Hooks, State Management (Redux), Component Architecture

UI/UX & Design Systems: UI/UX Design, Figma, Wireframing, Prototyping, User Flows, Design Systems, Component Libraries, Storybook

Styling & Responsiveness: CSS, SCSS, TailwindCSS, CSS-in-JS, Responsive Design, Cross-Browser Compatibility

Testing & Quality: Playwright (E2E), Jest, Testing Library, Cypress

Accessibility & Standards: WCAG, Semantic HTML, ARIA

Data & APIs: REST, GraphQL, WebSocket, API Integration, Authentication, Error Handling, Caching

Performance & DevOps: Code Splitting, Performance Profiling, CI/CD Pipelines

Visualization & Advanced UI: D3.js, Chart.js, Three.js, WebGL

Experience

Frontend UI/UX Developer – Early-Stage Startup Product Nov. 2025 - Feb. 2026

LLM-Powered OLAP Analytics Platform *Hamburg, Germany*

- Led **frontend architecture using Angular and TypeScript**, focusing on **scalable UI/UX systems and reusable components**.
- Designed and implemented **end-to-end UI/UX flows**, from **wireframes and Figma prototypes to production-ready interfaces**.
- Built **data-driven dashboards and visualization components**, ensuring **clear user journeys and intuitive UX**.
- Defined and evolved a **modular design system**, improving UI consistency and development speed.
- Integrated APIs and handled **auth, caching, and error states** for reliable user experience.
- Ensured **responsive design, accessibility (WCAG), and cross-browser compatibility** across the

platform.

- Collaborated closely with stakeholders to drive **product decisions with strong user empathy and UX focus**.

Software Engineer - Specter Automation May. 2022 - Oct. 2024

Construction Automation *Cologne, Germany*

- Developed a large-scale **Angular + TypeScript platform with strong UI/UX emphasis** for B2B workflows.
- Built **interactive UI components and 3D visualization features** using Three.js with a focus on usability.
- Partnered with designers to translate **UX requirements into intuitive, high-performance interfaces**.
- Implemented **Playwright E2E tests and frontend testing strategies** to ensure UI reliability.
- Improved **frontend performance** through optimization techniques and efficient rendering patterns.
- Contributed to **design system consistency and UI component standardization**.

Junior Frontend Developer - Coindex Dec. 2019 - Aug. 2021

Cryptocurrency platform *Bielefeld, Germany*

- Developed **React + TypeScript applications** for real-time trading dashboards with strong **UI/UX focus**.
- Built reusable components using **Storybook-driven development**, improving UI consistency.
- Created **data visualization features using D3.js**, enhancing user insights and experience.
- Managed **state using Redux**, ensuring predictable UI behavior and performance.
- Focused on **responsive UI design, accessibility, and cross-browser compatibility**.

Angular Developer - iDeators Technologies Dec. 2017 - Dec. 2018

IT services *Mumbai, India*

- Built **UI modules with strong UX considerations** for an e-commerce platform.
- Implemented **authentication flows and API integrations**, ensuring smooth user journeys.
- Worked closely with designers on **UI/UX improvements, mobile-first design, and usability**.
- Delivered **responsive, accessible interfaces aligned with modern UI standards**.

ACADEMIC & TECHNICAL PROJECTS

Smart Factory Digital Twin (React, Three.js, WebSocket)
Personal Project May 2025 - Present

- Developed a **real-time UI system** with interactive controls and visualization.
- Designed **user-centric UI/UX for monitoring** and control workflows.

Near-Shortest Path Routing in Hybrid Communication Networks (Master's Thesis)
Paderborn University Feb. 2025 - Jul. 2025

- Designed and implemented routing algorithms in **Python** using **NetworkX** and **Matplotlib**.
- Focused on scalable routing strategies in hybrid network models.

Car Damage Assessment System
Mumbai University Jun. 2018 - May 2019

- Built a machine-learning-based image classification system for insurance use cases.
- Developed frontend design using Angular 6.
- Co-authored a paper on machine-learning-based damage assessment for insurance

---

Language Skills

English: C1 (Fluent - Professional Proficiency)

German: B1 (Intermediate - in progress)

Education

Paderborn University Oct. 2019 - Jan. 2026
Master's in Computer Science Paderborn, Germany

Mumbai University Jun. 2015 - May 2019
Computer Engineering Mumbai, India
