## Summary

Frontend-focused Software Engineer with 5+ years of experience building production-grade web platforms across **fintech**, **analytics**, and **automation**. Specializes in **React**, **TypeScript**, and **Angular**, with strong command of state management, REST API integration, WebSocket connections, and frontend testing. Experienced with CI/CD workflows, data visualization, and shipping accessible, performant interfaces in product-driven environments.

## Core Skills

**Frontend:** React, Next.js, Angular, TypeScript, TailwindCSS, SCSS, Chart.js, Three.js

**State Management:** RxJS, NgRx, React Context, custom hooks

**Testing & Quality:** Playwright (E2E), Jest, Testing Library, Cypress

**APIs & Real-time:** RESTful APIs, WebSocket, async/await, error handling

**Backend:** Node.js, Flask, SQL, MongoDB, Firebase

**Cloud & DevOps:** AWS (S3, Lambda), Docker, GitHub Actions, CI/CD

**Tooling:** Git, Storybook, Monorepo, Figma

**Performance & DevOps:** Code Splitting, Performance Profiling, CI/CD Pipelines

**Concepts:** UI architecture, design systems, component libraries, accessibility (a11y), data modeling

## Experience

### Fullstack Engineer - Early-Stage Startup Product

Nov. 2025 - Feb. 2026

*LLM-Powered OLAP Analytics Platform*

*Hamburg, Germany*

- Architected and built a full-stack **LLM-powered analytics platform** from scratch, owning frontend systems end-to-end.
- Designed and implemented **interactive dashboards** with complex data visualizations for OLAP workloads.
- Built conversational **natural-language-to-SQL** workflows, consuming REST APIs between LLM outputs and production UI.
- Developed **frontend architecture, services, and data models** with a focus on scalability, consistency, and reliability.
- Collaborated with founders on system design, MVP scope, and technical strategy.

### Software Engineer - Specter Automation

May. 2022 - Oct. 2024

*Construction Automation Platform (B2B)*

*Cologne, Germany*

- Developed and maintained a large-scale **Angular + TypeScript** B2B platform with complex UI/UX workflows.
- Built **3D visualization systems** using **Three.js**, delivering interactive spatial interfaces for construction use cases.

- Introduced **end-to-end testing** with Playwright/Cypress and contributed to **CI/CD** pipelines via GitHub Actions.
- Improved frontend quality through systematic debugging, performance optimization, and code reviews.

### Junior Frontend Developer - Coindex

Dec. 2019 - Aug. 2021

*Cryptocurrency platform*

*Bielefeld, Germany*

- Built **React + TypeScript** dashboards for real-time cryptocurrency data with **REST API** and **WebSocket** integrations.
  - Developed reusable component libraries and data visualization features for live market analytics.
  - Contributed to **testing automation and AWS deployments** (S3, Lambda).
- 

## ACADEMIC & TECHNICAL PROJECTS

### Smart Factory Digital Twin (React, Three.js, WebSocket)

*Personal Project*

May 2025 - Present

- Developed a **real-time UI system** with interactive controls and visualization.
- Designed **user-centric UI/UX for monitoring** and control workflows.

### Near-Shortest Path Routing in Hybrid Communication Networks (Master's Thesis)

*Paderborn University*

Feb. 2025 - Jul. 2025

- Designed and implemented routing algorithms in **Python** using **NetworkX** and **Matplotlib**.
- Focused on scalable routing strategies in hybrid network models.

### Car Damage Assessment System

*Mumbai University*

Jun. 2018 - May 2019

- Built a machine-learning-based image classification system for insurance use cases.
  - Developed frontend design using Angular 6.
  - Co-authored a paper on machine-learning-based [damage assessment for insurance](#)
- 

## Language Skills

**English:** C1 (Fluent - Professional Proficiency)

**German:** B1 (Intermediate - in progress)

---

## Education

### Paderborn University

*Master's in Computer Science*

Oct. 2019 - Jan. 2026

Paderborn, Germany

### Mumbai University

*Computer Engineering*

Jun. 2015 - May 2019

Mumbai, India

---
